# watercolour

Atlantis Watercolour, a world's first, water activated, non-amonia, non-peroxide hair colour. With 44 colours in the range, Watercolour works like a stain wrapping around the hair making it thicker and shinier.

Atlantis Watercolours' lack of harmful chemicals means that it is a safer alternative to modern day colours and will improve the condition of hair no matter how many times it is used. Traditional peroxide based colours open the cuticle to let the colour in, watercolour acts as a stain that wraps around the cuticle thickening the hair whilst adding colour and shine. In fact, Atlantis Watercolour is an effective reconditioning treatment, with no smell or fumes it leaves the hair richly coloured, shiny and healthy.

Available as a semi, demi or permanent colour, this treatment is 95% water-based and is effective in colouring grey hair. With 44 colours in the range, including

it's newest edition, Clear, a fantastic clear gloss that adds shine to any coloured hair. Atlantis Watercolour is efficient, safe and competitively priced in the marketplace, retailing at \$26.95.

ATLANTIS HAIR offers modern, organic hairdressing, combining current innovations in natural and organic hair products with the talents of leading stylists from around the world.
